

Calculus 2 - Exam 2 Corrections

Professor:

Dr. Joanna Bieri
joanna_bieri@redlands.edu

If you would like to earn points back on your first exam you have the opportunity to participate in test corrections.

Here is your checklist:

- [] Correct the problems that you missed on the exam. Make sure this is neatly written and your work is clearly explained. On a separate piece of paper you should redo each problem that you missed more than 1 point on and explain why your solution is correct. You must completely rewrite and explain the problem. (**This will earn you 50% of the points back**). You must do all the corrections to earn back the points.

This means:

- If you earned an 80% you can raise your grade to a 90%
- If you earned an 70% you can raise your grade to a 85%
- If you earned an 60% you can raise your grade to a 80%
- If you earned an 50% you can raise your grade to a 75%
- If you earned an 40% you can raise your grade to a 70%

- [] Do the Exam Correction Problems and Self Reflection. Once you have the Exam Correction Problems done, email Joanna your attempt. She will email you solutions and you should correct your problems (in another color). If you got some wrong say why. (**You can earn one point per problem**).

- [] Staple together (in order please) and hand in:

1. Your original Exam and Corrections.
 2. Your self reflection.
 3. The new Exam Correction Problems that you did along with any corrections.
 4. Your original exam
