

Differential Equations – Advanced Problem Set 12

Professor:

Dr. Joanna Bieri

joanna_bieri@redlands.edu

Directions: Do the following book problems

Section 2.4 Problems 25, 29

You should do what the problem in the book asks AND include information about an error and convergence analysis.

Other Notes:

1. These problems are significantly simpler if you are willing to try doing them in Python, but they should be doable on a calculator.
