

Differential Equations – Homework 3

Professor:

Dr. Joanna Bieri

joanna_bieri@redlands.edu

Directions: Do the following book problems

From the book:

Section 1.3: 11,12,17

Section 1.4: 1, 2,4,12,17,23,25

There are additional notes online and an example in the book about Newtons Law of Cooling.

Other Notes:

1. Remember to keep working on your foundational skills. If you want more integration practice come see me!
2. This is a good time to review the idea of limits of functions. You can probably find this at the beginning of your calculus book.
