

Differential Equations – Homework 34

Professor:

Dr. Joanna Bieri

joanna_bieri@redlands.edu

Office Hours:

Homework 34

Other Notes:

Directions: Complete the Colab Notebook Problems

Today's class materials include a Google Colab Notebook. Your goal is to complete all the practice problems in the notebook. The goal of this is not to teach you all of the ideas of Python Programming, but rather to teach you how to use already written code to explore numerical solutions to ODEs.

You will submit your homework as a link to your Colab Notebook - see the video to learn how!
