

Differential Equations – Homework 5

Professor:

Dr. Joanna Bieri

joanna_bieri@redlands.edu

Homework 5

**Directions: Do the following book problems
From the book:**

Section 1.6: 2,7,10,17,21,

Other Notes:

1. Remember to keep working on your foundational skills.
2. See the course website for some tutorials in Algebra and Integration. One strategy is to do 2-4 algebra/integration problems EVERY DAY, this makes the workload small and you are practicing to become fluent in mathematics.
3. Start now making a cheat sheet for doing homework. Think of all the algebra, trigonometry, integration, and ODE rules that you might need on hand to make your life easier and keep those on a separate, easily accessible list. Work on memorizing your list!!
