

Partial Differential Equations

Homework Requirements

Professor:

Dr. Joanna Bieri
joanna_bieri@redlands.edu

Homework is graded as pass fail. Either you meet all the requirements or you do not. If you fail an assignment you have one chance to redo it for full credit. You will always have access to my written solutions to check your work **so BEWARE of plagiarism!** Your work should be written up in your own words. Sure some of the equations and/or answers might look the same, but you will have your own way of explaining the logic. I highly recommend that you all work together to get the homework done.

Requirements:

- [] Your handwritten work is neat enough that other members of the class could reasonably follow your work and understand your solution.
- [] You have attempted every problem assigned for the week.
- [] You provide a mathematically (logically) correct solution for at least 90% of the problems.
- [] You explain your logic.
- [] You choose one problem from the week that you are proud of solving and type it up using L^AT_EX.
